

Session title: Computational Intelligence in Human Activity

#### Abstract

Computational Intelligence plays an important role in different areas of human activity. Reasoning, prediction, modelling, optimization, decision making, etc. need modern, soft and intelligent algorithms, methods and methodologies to solve in the efficient ways different real life problems encountered by human.

#### Topics

- Computational Intelligence methods for reasoning
- Computational Intelligence methods for prediction
- Computational Intelligence methods for modelling
- Computational Intelligence methods for optimization
- Computational Intelligence methods for decision making

#### Chair

Krzysztof Pancierz, University of Information Technology and Management in Rzeszow, Poland [kpancerz@wsiz.rzeszow.pl](mailto:kpancerz@wsiz.rzeszow.pl)
